

OFFERING SHEET

We run the technology so your team can run the mission.

HyperDrive is an IT solutions provider in Metro Atlanta built around the way churches, nonprofits, and private schools actually work: small staffs, tight budgets, volunteer help, donated equipment, and a calendar that does not pause for a server problem. We manage the network, protect the data, and keep Sunday, and every other day, running.

WHAT WE DELIVER

SIX SERVICE LINES

01 Managed IT Services Full coverage of your systems, monitored and maintained so problems get caught before they reach staff.	02 Networking Design, configuration, and tuning of the wired network that everything else depends on.	03 Wireless Fast, secure coverage across sanctuaries, offices, classrooms, and every building on campus.
04 Voice Modern phone systems that cut operating cost and tie multiple locations into one directory.	05 Cloud Services Migrations and cloud platforms that add flexibility without adding hardware to maintain.	06 IT Projects Scoped work for moves, refreshes, and upgrades, planned and delivered end to end.

INSIDE A MANAGED IT AGREEMENT

- 24/7 monitoring and support from our team
- Data backup and disaster recovery
- Network management, from design to troubleshooting
- Software updates and hardware maintenance

CLIENT COMMENTS

METRO ATLANTA

“A vital partner to the mission and ministry of the church.”

BUSINESS ADMINISTRATOR
JOHNS CREEK UNITED METHODIST CHURCH

“A trusted and responsive partner.”

OFFICE MANAGER
HAYGOOD UNITED METHODIST CHURCH

BUILT FOR THREE KINDS OF WORK

WHERE WE SPECIALIZE

CHURCHES

Ministry runs on the network now.

Giving, member records, streaming, check in, and staff collaboration all sit on the same infrastructure. We keep it steady through the week and ready on Sunday.

- Wireless that holds up across the sanctuary and children's wing
- Security for member, giving, and background check data
- Phone service across campuses and satellite locations
- Backup and recovery for the systems a weekend depends on

NONPROFITS

Lean teams, wide reach.

Small staffs carry large programs, often across sites and time zones. We put industry standard systems underneath them so the work scales without adding headcount to IT.

- Cloud platforms that let remote and field staff work anywhere
- Protection for donor, grant, and program information
- Standardized accounts and access control as staff turn over
- Backup and disaster recovery for program and financial records

PRIVATE SCHOOLS

A campus full of devices, every day.

Classrooms, labs, offices, and a network that has to hold up for students and faculty at once, on a budget set a year in advance.

- Wireless built for classroom density and one to one devices
- Segmented networks for student, staff, and guest traffic
- Protection for student, family, and enrollment records
- Summer windows for refreshes, moves, and rollouts

WHY ORGANIZATIONS STAY

THREE REASONS

Specialized expertise

We work with churches, nonprofits, and schools every day, so we know the constraints before you have to explain them.

Community footprint

We are part of the Atlanta community we serve, not a call center in another state.

One partner, whole stack

Network, wireless, voice, cloud, and security handled by one team that knows your environment.

Request a call.

Tell us what is breaking, or what you are planning. We will tell you what it takes.
